

New Food Grade Sprays

NEW IKV FOOD SAFE SPRAYS

As part of our rebrand project for 2015, we have launched a new range of food safe sprays. **Aerosols** offer a convenient and neat package of the 'product' and 'means of application' in a simple to use and efficient package.

They are easy to manage and convenient to use. Our range offer you solutions for all applications in the food processing industry from lubricants for chains and slides to blades and cutters. Our new range includes:

NSF-H1 Registered - Incidental Food Contact

TRIBOFOOD PENETRATING SPRAY

Excellent penetrating and release properties
Penetrates Corrosion – ideal for use on cables, conveyors, chains, bearing and pins
Fast and convenient to use
Temperature range of -20 to 110°C

TRIBOFOOD SILICONE SPRAY

Safe for use on all plastic, metal, glass and rubber
Used widely on electrical components
Excellent water dispersant and also repels dirt and dust
Used to protect a wide range of parts & equipment in food processing areas

TRIBOFOOD WHITE SPRAY GREASE

Water and heat resistant white oil and synthetic grease
Extremely tenacious lubricant
Lubricates and protects hinges, bearings & moving parts

TRIBOFOOD CHAIN & DRIVE SPRAY

Reduces noise and penetrates and lubricates inaccessible parts
Non-toxic and water resistant
Ideal for rotating and moving parts
Offers excellent corrosion protection

NSF-K1 and K2 Registered – Fast Drying Solvent

TRIBOFOOD RAPID CLEAN

Multi-purpose degreaser—removes dirt, grease, dust, oil and other deposits
It prevents arcing between dry contacts
Ideal for cleaning components and precision parts

New Food Grade Sprays

TRIBOFOOD X-TREME TF SPRAY

Extremely versatile lubricant with good corrosion protection
 Good penetrating and release properties
 Contains PTFE to form a long lasting, protective and lubricating film
 Good water displacement properties
 Protects and extends the life of machine parts
 Ideal for use on chains, bearings and slides in the food industry

FOOD GLIDE 3H OIL SPRAY

For use on slides, seals, guides, bearings and blades in the food industry
 Widely used as overnight protection for blades and slicers
 Excellent wide temperature resistance -10°C to +110°C
 For use as a direct food contact release agent and as a lubricant

Please contact us for technical support, samples and pricing.

NSF-3H Registered - Direct Food Contact

FOOD GLIDE 3H GREASE SPRAY

Less risk of contamination
 Excellent wide temperature resistance -10°C to +110°C
 Good oxidation stability results in extended lubrication intervals
 For use as a direct food contact release agent and as a lubricant
